MVC Architecture

Personal Projects

Hangman
- The classic game of Hangman with the feature of users being able to be creative with their custom words and phrases.

King Richard Budget
- Zero based budget, currently a work in progress, that is aimed to help Latter Day Saints and others not of that faith to manage their respective finances better.

Objective

Passionate, driven web developer eager to join a development team, as a Full Stack Developer. Looking forward to take advantage of my skills in HTML, CSS, JavaScript & Node.js to help contribute to the success and growth of the company.

Skill Summary

Front End Development

1. HTML5, CSS3, JavaScript
   a. Utilized HTML, CSS, and JS to develop my personal website / portfolio.
   b. Utilized JS | Vue.js to develop a game of Hangman that accepts custom user words.
   c. Currently working on a zero-based budget with many features with HTML5, CSS3/SCSS, JS.
   d. Utilizing Axios requests in my zero-based budget to interact with my MongoDB Database.

2. Visual Design
   a. Created responsive websites using modern CSS techniques and JS.
   b. Utilized software such as Inkscape, Illustrator, and Photoshop to create mockups and wireframes.
   c. Did my own logo design for my website, budget, and much more with Inkscape. I am able to replicate those in Adobe Illustrator & Photoshop.

3. Testing / Debugging
   a. Familiar using Git with Github.
   b. Familiar using the Crhome Developer Tools & Firebug

Back End Development

1. Node.js/Express.js
   a. Used Node.js with the Express.js framework to build a working contact form on my personal website.
   b. Currently working on a zero-based budget which utilizes the REST architecture to perform the CRUD operations.
   c. Familiar using Node.js/Express.js with MongoDB Database functions.
   d. Familiar with testing API calls using Postman.

2. Web Architecture & Security
   a. Familiar with using MVC architecture with Node.js / Express backend.
   b. Familiar using JSON Web Tokens for secure signup and login of users with my zero-based budget.

Work Experience

Data Entry Clerk
METASOURCE | June 2020 - Present | Draper, UT
Paid close attention to detail to be sure mortgage documents were correctly entered in.

Shopper
SHIPT | August 2019 - January 2020 | South Bend, IN
Planned in detail to deliver the customer's order by a specific deadline. Did so while meeting the variability of the customer's order with a cheerful and optimistic outlook.

Selector
NFI INDUSTRIES | November 2018 - October 2019 | South Bend, IN
Worked as a team to be sure to get nearby regions their bread orders. Audited specified orders nightly to correct errors that were made to stop previous errors from persisting.

Package Handler
FEDEX GROUND | July 2018 - November 2018 | South Bend, IN
Collaborated with our delivery drivers to load their trucks to their specifications to help meet their delivery goals.

Warehouse Worker
NOVASHIP | November 2017 - April 2018 | West Valley City, UT
In an organized, detailed, and efficient manner, we worked together to assemble customer's specific orders to be shipped out.

Shipper
KURU FOOTWEAR | April 2017 - November 2017 | Murray, UT
Worked with minimal supervision to efficiently meet tight deadlines for orders to be shipped out.

Package Handler
FEDEX GROUND | July 2015 - March 2017 | Vineyard UT
Being cross-trained in many areas of the operations, helped to double the outgoing volume going through the facility nightly by going above and beyond for the companies in the area shipping with FedEx.
